SHEPHERD LIBEL CASE BEFORE JUSTICE RHEES

Special to The Tribune.
OGDEN, April 26.—The preliminary hearing of J. J. Shepherd on the charge of criminal libel came up before Justice Rhee at Pleasant View today. The defendant had subpoenaed a large number of witnesses and the case dragged along slowly the whole day, nothing of a material nature being brought out.

Willard Sowerford, wife and three children, left last night for Europe on an extended visit.

Judge Rolapp and the other court officers were in Farmington yesterday trying the case of the State against W. H. Smith, charged with the charge of horse stealing. Smith was convicted and sentenced to one year in the penitentiary.

E. W. Gillett, general passenger and freight agent of the San Pedro was in the city yesterday enroute for Salt Lake from Los Angeles.

Funeral services over the remains of C. J. Weaver were held today in the city meeting-house. She was the daughter of Joseph and Elizabeth Allen, a well-known settler. Her husband was killed by a train in 1892. She was married to C. J. Weaver, and has a son, C. J. Weaver, Jr., who is now in the city.

A letter has been received here from George Gibbs, who is now at Kansas City, Mo., stating that a match be arranged between himself and Jerry McCarthy. McCarthy was returned to Salt Lake, but the matter will be laid before him.

Frank Pinger has returned from a three years' mission to Germany.

George J. Cunningham yesterday morning presented Mr. Cunningham with a bouncing daughter.

W. Bunting, the millionaire brakeman, passed through yesterday morning enroute to Salt Lake.

Lee Gibson left last evening for Omaha.

A. Taylor is in Ogden from Idaho.

Rose Cochran appears at the Grand this evening in "The Greatest Thing in the World."

Charles W. Ellis of the United States Bureau of Labor is in the city from Washington, D. C., collecting data on the issue of the State.

Marjorie J. Gunnell and wife are home on El Paso, Tex.

Weber county will receive about 100,000 bushels of wheat from State Warden Sharn.

Commissioner Wilson will visit them in Ogden river.

H. H. Thomas is photographing the Ogden school buildings for the educational exhibit at the World's fair.

John Slocum, president of the International Brotherhood of Blacksmiths, was in the city yesterday from Chicago.

Leon Stenograph, Daniel Hamer went Ogden yesterday to act as stenographer.

Judge Hart in the trial of William Smith, charged with horse stealing.

A marriage license was issued yesterday to H. B. Scoville, aged 25, of Ogden, and Mary Rawlinson, aged 23, of San Francisco.

The Ogden lodge of Elks gave its annual ball at Dugan's hall tonight.

Migration Companies Incorporated.

Special to The Tribune.

COALVILLE, April 26.—Articles of incorporation of the Upper Creek Creek irrigation company were filed today with County Clerk.

The company is capitalized for \$200,000. James Johnson is president, John H. Salmon is vice-president, W. E. Chappell is treasurer.

Articles were filed at the same time of New Field and North Beach Irrigation company, which is capitalized for \$500,000, divided into 5000 shares at par value of \$1 each. The officers are as follows: Christian Jensen, president; E. W. Bunting, vice-president; George C. Stevens, secretary, and John Jensen, treasurer. They, with Elizabeth Jensen, Pearl Jensen, and W. W. Hostin, are on the board of directors.

The County Clerk this morning issued marriage licenses to James Francis Bland, aged 25, and Ethel Cunningham, aged 23, both of Park City.

District court convenes here next Monday.

His Wager, but Loses Beard

Locksmith Held Fast by His Whiskers Caught in the Door of Safe.

PHILADELPHIA, Pa., April 6.—Fast by his whiskers, a Frenchman had a sad time of it today at a Manayunk. The Frenchman, an expert locksmith, went to store and offered to wager any man he could open a safe in which the storekeeper keeps his cash.

The storekeeper was absent at the time, so some friends who were present accepted the Frenchman's proposition.

After working at the door for half an hour, he threw it open and the Frenchman, who was very tired, stepped out and found that his beard was caught in the door.

He tried to work the combination, but would not budge, and even when he tried to pull it out, the door would not open.

He tried to pull it out, but the door would not open, and he was forced to leave.

He tried to pull it out, but the door would not open, and he was forced to leave.

He tried to pull it out, but the door would not open, and he was forced to leave.

He tried to pull it out, but the door would not open, and he was forced to leave.

He tried to pull it out, but the door would not open, and he was forced to leave.

He tried to pull it out, but the door would not open, and he was forced to leave.

"Mother" Jones Is Again in Prison

Noted Strike Sympathizer Breaks Quarantine Again, Goes to Prison and Is Placed in Jail.

Special to The Tribune.

PRICE, Utah, April 26.—"Mother" Jones again broke quarantine at the Half-way house, at Stricktown, today and, with four wagonloads of women and children of the striking Italians, came to Price to offer her sympathy to the imprisoned miners who were arrested by the Sheriff's posse Sunday. She was arrested a few minutes later at the improvised stockade, and is now in the county jail.

At the temporary quarters of the prisoners this morning the 115 who are held there said they had plenty and to spare of both food and bedding. It is claimed that they are living better as guests of Carbon county than they live at home. Tomorrow morning they will leave here on a special and have their hearing at Helper. Public sympathy, which reached a high pitch yesterday, has about given way to a feeling of resignation to the process of the law, and the loudest protests in Price are forced to acknowledge that the prisoners are getting fair treatment. It is said that Utah will deport some of the leaders, with the advice to remain away.

Sam H. Gibson, who was arrested for disturbing the peace, is at liberty, under bonds.

Provo Councilman Resigns.

Special to The Tribune.

PROVO, Utah, April 26.—At the session of the City Council last evening the resignation of Jesse Harding as Councilman from the Third ward was accepted. Councilman Miller moved to appoint Eph Homer to fill the vacancy. The resignation was left over for one week. Mr. Harding is one of the Republican members, and with his resignation the Council will consist of five Democrats to four Republicans.

The case of J. H. White vs. Joseph Shoenl has occupied the attention of a jury in the Fourth District court, with Judge Marionaux on the bench.

The plaintiff is suing the defendant for \$100 damages for personal injuries. The plaintiff and defendant on July 4, 1903, had a

DEVELOPING MANY GOLDFIELD LEADS

New and Rich Ore Showing in Ledges Uncovered in Various Mines in Nevada.

Special to The Tribune.

GOLDFIELD, Nev., April 26.—The St. Francis-Goldfield Mining company has been incorporated under the recent act of Congress and has a perpetual charter, good in any State. The company started to work Monday on its August claim, which joins the Combination on the southeast. Joel B. Dow of Beloit, Wis., attorney for the Chicago, Milwaukee & St. Paul railway, is president of the St. Francis-Goldfield company. Dr. Francis Williams is vice-president, treasurer and general manager, and W. J. Peacock is secretary. The capital stock is \$100,000 shares of the par value of \$1 each, and there are 200,000 shares in the treasury. One block of 50,000 shares was sold two weeks ago in San Francisco and the present price of treasury stock is 25 cents per share.

H. S. Cadle has sold his interest in the Eagle group to George B. M. Gray, a capitalist of Oakland, Cal. This is a promising property and the present owners are Col. Brougher, Douglas, Mims, Heller, Winkler and Gray.

The lease of Kendall, Kelly, Jones and Patrick on the Junction group, which is the heaviest output in the camp. The sacks of shipping ore are accumulating faster than the freighters can haul them to the railroad, and the camp is now going from \$40 to \$50 per ton, is assuming big proportions.

The Combination has started a drift at the 135-foot point in the shaft and are outfitting fair quantities of the fine looking white ore, which many say contain tellurium or sylvanite, and others deny. Drifting is also carried on at the 135-foot point, two men are now at work on this property.

Frank M. Ish has put men to work on the Black Butte claims. A diamond field, and will try to find out how big a bonanza he has in that property.

The reports from Keane, McMahon and Fletcher's property, near Diamondfield, are of a satisfactory nature. The ledge is proving to be as large as it was near the surface and contains much tellurium ore of shipping value.

In a crosscut from the 50-foot point in the Beaumont lease on the Combination Fraction the apex of a ledge was opened up which contains good looking quartz. The ledge shows values in free gold and the shaft will be sunk to the 100-foot point, and the ledge again tapped. As the ledge was shown that the ledge was widening a good body will probably be found at the 100-foot point. The Patrick lease on the Beaumont group is being sunk down 25 feet and the ledge is just coming in at the side of the shaft.

The Quinn lease on the Jumbo still has a splendid showing and will soon be added to the list of shippers. In the west crosscut from the 50-foot point in the shaft there are four feet of pay ore, but it has not yet reached the point where the rich ore was opened upon the surface. Assays from the screenings show values of \$125 per ton.

Connelly, Hennessy and Malligan, who have a lease on the Cornishman, are trenching on Jumbo ground for the purpose of determining the trend of the ledge. They have taken a lease on it from the 50-foot point in the shaft.

The shaft on the Mohawk No. 2 is down 50 feet and they will soon crosscut to a fine looking ledge, which has been opened up 50 feet from the shaft.

Watson Bros and Ninns have taken a lease on the Uncle Sam on Columbia Mesa and they have taken a lease on it and are taking out quartz that looks well.

McLaughlin, Wellman and others have four men at work on the Examiner claim, which lies about 100 feet northwest of the Blue Bull.

S. E. Vermilyea is down 30 feet on the Wild Horse group, which he recently bonded from Lund and Ramsey. At 60 feet he will crosscut the ledge.

R. L. Johnson and others are leasing on the Deseriet Quartz and Silver Pick expect to sink a shaft 300 or 400 feet deep and thoroughly prospect that territory.

King and Yeiser have taken a lease on the Mohawk No. 1 and think they will soon open up the extension of the Red Top ledge.

MUCH ACTIVITY SHOWN IN ELKHORN DISTRICT

Special to The Tribune.

PARK CITY, April 26.—Great activity is manifest in the Elkhorn district, where the Nelson strike occurred recently and attracted so much attention. This promise to be a great year of development in the new territory. The Hot Air group, which covers some 240 acres of territory, will start a regular campaign of development today or tomorrow. The proposition is backed by such men as Henry Spriggs and James Quinn, who are determined to keep men at work until the value of the ground is demonstrated.

George Wilson will start a camp on the Eagle group which is said to have good backing, and the fine outcrops will be treasured, to be followed by deeper prospecting.

John Murphy and son are back at work at the Northern Belle. The Emerald tunnel is being pushed steadily toward the ledge, which is now almost reached, under most favorable conditions.

The Nabob shaft is down thirty-five feet, with a remarkable and increasing mineralization. The recent find of ten or twelve inches of rich galena ore in the abandoned incline between the Majestic and Cummings ground has given quite an impetus to prospecting, and a new group has been located.

The Nelson shaft is being pushed down steadily and the improvement of the sulphides in a lime gangue, which has supplanted the carbonates above, has led to the most sanguine expectations—these ores now appearing in significant quantities and promising soon an immense deposit.

An appreciative audience enjoyed a musical treat at the Dewey theater last night by the Mervart Symphony club of New York.

Mr. and Mrs. Arthur Davies left yesterday for California, where they will make their future home. This is necessitated by the near health of Mr. Davies in this climate.

Mrs. W. M. F. Allen of North Park has returned home from an extended visit on the Pacific coast.

Two More Strikes Made at Goldfield

Ore Shows Value of \$500 Per Ton, and One Four-Pound Sample Assayed \$6120 Per Ton.

Special to The Tribune.

GOLDFIELD, Nev., April 26.—Two strikes have been made during the past week at Goldfield which are as big if not bigger than any heretofore made in a district which in a few months has become famous for its rich strikes.

The first was made by Altheim, Smith, Durgin & Ekins, who are sub-leasing from Hennessy & Sweeney on the Florence. The sub-lessees had drifted forty feet on the ledge at a depth of fifty feet, when they encountered a high-grade ore chute which contains sensational values. Two and one-half feet of the ledge would go above \$500 per ton, and a four-pound sample which was taken across eighteen inches assayed \$6120 per ton.

Some of the pinnings have indicated much greater values, one which was made Monday leaving \$250 worth of gold in the pan. Ore is sacked for shipment and one more shipper is added to the list at Goldfield.

Found Rich Ore.

When Hennessy & Sweeney first began work on the lease they found rich ore, some going as high as \$500 per ton. They started a perpendicular shaft in the property and at fifty feet crosscut to the ledge. The ore at this point was in the main low grade and drift, but a few feet each way showed no improvement, with the sub-lessees kept at work, with the result above noted. They are now at the foot of the high-grade chute and there is every reason to believe that it will extend for a good distance.

Cook Bros., Simmel & Barnes, who have the lease adjoining, will now work with renewed vigor to catch the same ledge. The Florence group is owned by Kernick, Taylor, McClelland, Lockhart & Parker, the latter being a prominent railroad man of Denver.

Worked Three Days.

The second strike was made in Capt. Bradley's lease on the Red Top, near the base of Columbia mountain. Capt. Bradley had been at work but three days on his lease.

The ledge on the Red Top is forty feet wide and is opened for twelve or fifteen feet on this ledge. The ore was covered by a few feet underground and the start carried big values. One assay showed values of \$450 per ton, but some of the pinnings showed values up to \$1000 per ton. Of two samples taken across six feet of the ledge one returned \$125 per ton and another \$150 per ton.

Bradley is a well-known miner, who for some time past has represented Senator Kearns of Utah and his partner, H. C. Marcus, who is one of the owners of the Red Top, has taken a lease on 150 feet at the north end of the claim and will start work immediately. Mr. Elliott of Tonopah bought 50,000 shares of treasury stock and 20,000 shares have been sold to others.

The mine started at 15 cents per share, advanced to 20 cents, and it is said 20,000 were sold today at 25 cents.

MRS. BOTKIN'S ATTORNEYS MOVE DISMISSAL OF CASE

SAN FRANCISCO, April 26.—When the examination of the Delavare witness in the case of Mrs. Cordelia Botkin, accused of the murder of Mrs. Joshua Deane, was concluded in the police court last week the defendant's attorney moved for a dismissal of the case and Judge Conlan took the matter under advisement until today.

Mrs. Botkin came into court today without counsel, and the judge postponed the matter until tomorrow, reserving his decision and stating that, if necessary, he would appoint counsel to represent her.

Utah Woman May Talk Two Minutes

Reason Why General Federation of Women's Clubs Declined to Hear Mrs. Coulter.

Special to The Tribune.

OMERVILLE, Mass., April 26.—In response to an inquiry from one of the directors of the General Federation of Women's clubs, Mrs. Anna D. West, chairman of the programme committee of the biennial convention of the General Federation to be held at St. Louis next month, has announced that the name of Mrs. Chester E. Coulter of Ogden does not appear on the official programme at all. It will be at a meeting of the household economics section, and her address will not be of more than two minutes' duration.

While Mrs. West would not say why Mrs. Coulter's name was not permitted to appear on the programme when it is known that strong pressure has been brought to bear to secure a place for her, it is known that the matter was decided at a meeting of the board of directors held some weeks since at St. Louis.

At that time interest in the Smoot case was very intense all over the country and some of the Eastern papers published the fact that Mrs. Coulter, formerly president of the Utah Federation and prominent in club work in Utah, had been for the Mormon apostle. Indignation was expressed among the members of the board of directors present at the St. Louis meeting and it was decided that the request made that Mrs. Coulter be one of the speakers at the biennial convention should not be granted.

It is not known here whether Mrs. Coulter is to attend the convention at St. Louis, but if she does attend and take part in the programme at all, it will be merely to give a few informal remarks at the household economic section.

NEW YORK, April 26.—Redfern, man dressmaker, of Paris, arrived the other day.

"It is an extremely delicate proposition to make the comparison between the most beautiful women of the world, the women of Paris and the women of America," he said, "poising a gold-tipped cigarette."

"As a Parisian I can look upon Paris only as the fashion center of the universe. We make the fashion. The world can only follow. Tell me the mode of Paris and I will tell you the mode of the world. Ah, but the American woman can wear the gown of America, but we design the gown that makes the beauty of her figure a glory, a marvel."

"The Parisian woman cannot be so large and still have the same perfection. In the newest styles there are always little differences that the man who is not the artist cannot see. It is not the newness of any one thing, it is the ensemble."

"If I should describe the ensemble, you—a man—would never understand. It is the little lace, the ribbon, the ruffle, the flower, the cut, the seam, but we design the fall, the veer, the tuck, the gather. These are the mysteries."

NEW YORK, April 26.—Tears saved the eyesight of Charles Solomon, a sixteen-year-old newsboy, today.

Solomon saw a bottle lying in the street and smashed it with a stone. It was filled with carbolic acid and the fiery liquid flew into his face, burning his eyes and face. He suffered terribly and cried piteously.

With his hands covering his burns, the boy rushed up to Policeman Cavanaugh and told him what had happened. Dr. Kernan, from the Presbyterian hospital, said he could save the boy's eyesight, at the same time removing the acid from doing his greatest harm.
